

ARCHISMAN KUNDU

AI/ML ENGINEER | BACKEND DEVELOPER | FULL STACK DEVELOPER

ABOUT ME

B.Tech Information Technology student specializing in AI/ML, Backend Development, and Full Stack Engineering. Experienced in building AI-powered applications, scalable backend systems, and intelligent automation solutions. Completed an AI Developer Internship at a Techno India startup and participated in 10+ national-level hackathons. Passionate about solving real-world problems through AI.

EXPERIENCE

AI & Backend Developer Intern

Techno India Startup

October 2025 – December 2025

- Developed an AI Interview Platform using **Large Language Models**.
- Built backend APIs using **Node.js** and **Express**.
- Designed prompt engineering workflows.
- Automated candidate evaluation.

IEEE Research Intern

- Developed an ensemble sentiment analysis model combining **RoBERTa**, **BERT**, **DistilBERT**, and **VADER** to improve sentiment prediction on social media datasets.

GDG on Campus NSEC

2025 – Present

- AI/ML Core Member
- Organized AI/ML workshops and technical events.
- Contributed to hackathons and community initiatives.

Treasurer

IEEE CIS Student Chapter

2024 – 2026

- Managed budgeting and financial planning for chapter activities.
- Coordinated technical workshops, seminars, and hackathons.

PROJECTS

1. AI Interview Platform (Techno India Startup)

Tech Stack: Node.js, Express.js, LLMs, JavaScript, Next.js

- Developed an AI-powered interview platform that generates role-specific technical interviews using Large Language Models.
- Built backend APIs and automated candidate evaluation workflows using prompt engineering.

2. NGO Resource Allocation System (Google Solution Challenge)

Tech Stack: Next.js, Node.js, PostgreSQL, Google Maps API

- Built an AI-powered platform to connect NGOs, volunteers, and beneficiaries for efficient disaster relief and resource distribution.
- Implemented real-time volunteer allocation, SOS alerts, location tracking, and role-based dashboards.

3. HealAI

Tech Stack: Python, OCR, NLP, Machine Learning

- Developed an AI-assisted insurance claim platform with OCR-based document verification and intelligent claim processing.
- Integrated NLP-powered chatbot support to simplify claim submission and improve user experience.

TECHNICAL SKILLS

Languages

- Python
- Java
- C++
- JavaScript
- TypeScript

AI/ML

- Machine Learning
- Generative AI

Backend

- Node.js
- Express.js

Frontend

- React.js
- Next.js
- Tailwind CSS

Database

- PostgreSQL

EDUCATION

2024–Present

Netaji Subhash Engineering College

B.Tech Information Technology

YGPA: 8.50

The Modern Academy

ISC (Class XII) : 92%

ICSE(Class X) : 96%

ACHIEVEMENTS

- Finalist – IIT Bombay Techfest
- Participated in 10+ National-Level Hackathons
- Led 7+ Hackathon Teams
- Core Member – GDG on Campus NSEC
- Treasurer – IEEE CIS Student Chapter

LANGUAGE

- English** (Fluent)
- Bengali** (Fluent)
- Hindi** (Fluent)
